

Where the Conversion Leaks Are

example.com · CRO Recommendations · August 2026

The homepage's single external 'Learn more' link to iana.org is the most valuable conversion mechanism on this site, but it bleeds value by terminating the funnel with no internal next step, no value proposition, and no trust signals, causing visitors to leave without any path to conversion.

#	Finding	Severity	Effort	PXL
1	Missing security headers 6 of 6 standard security headers are absent, which weakens protection against XSS, clickjacking and downgrade...	Medium	Medium	6/10
2	Single-step funnel dead end The page offers only one call to action that exits the site, leaving no defined next step in a conversion...	High	Medium	5/10
3	External link funnel dead end The only call to action navigates away from the domain to iana.org, terminating the conversion path without...	High	Medium	5/10
4	No value proposition The page copy only describes the domain's purpose for documentation examples and provides no statement of...	High	Low	5/10
5	No competing CTAs The page has exactly one call to action, so there is no ambiguity from competing options, but this also means...	Medium	Medium	5/10
6	Weak page metadata Search and social previews are degraded: page title (absent), meta description, Open Graph tags are missing...	Medium	Medium	5/10
7	Missing trust signals above the fold The homepage shows no sign of returns policy, guarantee, reviews, security badge, so a first-time visitor has...	High	Medium	5/10
8	No responsive viewport Without a viewport meta tag, mobile browsers render the desktop layout scaled down, making every tap target...	Urgent	Medium	4/10
9	Missing trust signals The homepage shows no sign of returns policy, guarantee, reviews, security badge, so a first-time visitor has...	High	Medium	4/10

#	Finding	Severity	Effort	PXL
10	Generic CTA label The only call to action is 'Learn more,' which does not communicate the offer or next step in a way that...	Medium	Low	3/10

How to read this

Findings marked **verified** were measured directly and are reproducible. Everything else is a hypothesis derived from inspecting the live pages, which is why the PXL evidence questions score zero for those items. Sized opportunities describe the prize if a change works, not expected revenue: roughly 10–30% of A/B tests produce a significant win, and winners tend to overstate their true effect.
